

Precision & Accuracy Data

Methods for Loading P & A Data To AQS

(with AQSP&A Demo)

Michael Hamlin
Bill Frietsche

Methods for Loading P & A Data To AQS

- Precision & Accuracy Reporting System (PARS)
- AQS On-line ***Correct***
- AQS On-line ***Maintenance***
- Other Methods
- AQSP&A Transaction Generator

Methods for Loading P & A Data To AQS

- Precision & Accuracy Reporting System (PARS)
 - Developed to analyze and format Precision and Accuracy transactions
 - Transactions can be manually created or imported into PARS
 - Transactions can be exported in a format that AQS would accept

Methods for Loading P & A Data To AQS

- AQS On-line ***Correct***
 - Select the heading **Correct** on the Main Menu of AQS
 - Select the data type to be entered
 - Populate the template and click the **Save** Button
 - Submit corrected data to AQS

Methods for Loading P & A Data To AQS

- AQS On-line ***Maintenance***

- Select the heading **Maintenance** on the Main Menu of AQS
- Select the data type to be entered
- Populate the template and click the **Save** Button
- Each record must be entered individually and saved

Methods for Loading P & A Data To AQS
